Zoom 5341j login

Online Green Link Green Problem: I cannot access the Internet. What should I do first? Solution: Make sure that your Cable Modem's MAC address is registered with your cable provider. When your provider's representative or setup software asks for your MAC address, you can find the CM MAC address on your modem's bottom label. If you are having a problem, you may need to check with your cable service provider to make sure the service provider set up its system properly for your cable modem. Make sure your Cable Modem's Power button is ON and that the cable modem's power cube is plugged into a live power outlet. Check your Cable Modem's Ethernet and coaxial cable connections. Make sure the coaxial cable is tightly connected. Make sure that the Ethernet cable that connects a computer or router to your Cable Modem is plugged in all the way on both ends. Power off your modem for at least 10 seconds and then power it back on. Restart your computer or other devices connected to the Cable Modem. This ensures that they receive a correct IP address. Problem: What do I do if my cable service provider wants me to access the Configuration Manager? Solution: Make sure you have a connection between your computer or other device and the cable modem. 1 On your computer, open a browser and type in the address 192.168.100.1 Enter 2 Now you will see status information about your cable modem and its connection that you can read back to your service provider. Problem: What if I'm told that my Model 5341J cable modem isn't approved for my cable modem service? Solution: This modem has been certified by CableLabs and by Comcast, Time Warner Cable, Cox, Bright House, and other cable modem service providers. You can often find a list of certified modems on the Web site of your cable service provider. Beware of installers who try to get you to use their cable modem instead of a Zoom cable modem. Some of these installers provide bad information because they are misinformed or because they earn a fee for providing their cable modem. If the installer tells you that a cable modem provided by him or the service provider is "free", that's almost never true. When in doubt, check the cable service provider's Web site! • In the unlikely event that you are told that your Zoom modem is not approved by your cable modem service, please email us at cableOK@zoomtel.com or call us at (617)753-0963. • Approval information for CableLabs, Comcast, Cox, and CableOne www.zoomtel.com/cableOK OFF Offline Flashing Connecting ON Online OFF There is not a live Ethernet connection Flashing Ethernet data is flowing ON There is a live Ethernet connection User Name: admin Password: password © is available at To get access to your Zoom 5341J (5341-00-00J), you need the IP of your device, the username and password. You'll find such information in the Manual of your Zoom 5341J (5341-00-00J) router. But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page it's necessary that you are connected to the router. Zoom 5341J (5341-00-00J) Login Guide Open your web browser (e.g. Chrome, Firefox, Opera or any other browser) Type 192.168.100.1 (the default IP to access the admin interface) in the address bar of your internet browser to access the router's web-based user interface. You should see 2 text fields where you can enter a username and a password. The default username for your Zoom 5341J (5341-00-00J) is admin.The default password is password. Enter the username & password, hit "Enter" and now you should see the control panel of your router. If above login credentials doesn't work with your Zoom 5341J (5341-00-00J) router then try this method Try different ID/password combinations that are widely used by Zoom that you'll find below. In this list are the most popular default username and password combinations used by Zoom. Sometimes the username and password doesn't work that we mentioned in the top of this guide. Then you can try these username/password combinations below to get access to your Zoom 5341J (5341-00-00J) wireless router. # Username Password 1adminzoadms12adminadmin3admin4n/an/a5userpassword6n/aadmin7adminzoomvoip8adminpassword9(blank)admin10n/a(blank)11admin(blank) Default login IPs for my Zoom router You tried different router IPs but nothing worked? Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer Zoom. Maybe this will work for you. # Default Router IP 1192.168.1.1210.0.0.23192.168.0.14192.168.100.1510.0.0.2006www.zoom.com/atamanager7192.168.123.2548192.168.0.2409192.168.2.1 Nothing of the methods worked for me and I still not get access to my Zoom 5341J (5341-00-00J)! All you need to do is to reset your 5341J (5341-00-00J) modem. This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, (you may have to use a toothpick), then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an expert's assistance in this regard. Note: If you have not enough information, it is obviously recommended that you should get help from a person who has all the knowledge about this topic. If your 5341J (5341-00-00J) router is not working as it should, dropping connections or not being responsive, you should first do a reset of the router to see if the problems persist. Other scenarios where you might want to reset your router is if you've forgotten the password or misconfigured it and can't get access anymore. Your can reset your Zoom 5341J (5341-00-00J) in the following way(s): The 30-30-30 reset There are no specific instructions for this model yet, but you can always do the 30-30-30 reset as follows: When router is powered on, press the reset button and hold for 30 seconds. (Use a paper clip or something sharp) While holding the reset button pressed, unplug the power of the router and hold the reset button for 30 seconds While still holding the reset button down, turn on the power to the unit again and hold for another 30 seconds. This process usually works for resetting any router to it's factory setting. Note: It is worth reading more about how to reset routers with the 30 30 30 reset and what the risks and considerations are when resetting your router this way, instead of just rebooting it.
